

**Requested Final Instruction No. 14: Nature of the Case**

You have heard about two types of cameras: point-and-shoot cameras and Digital Single Lens Reflex, or DSLR, cameras. It has been determined that Ricoh is required to pay Kodak royalties on Pentax's sales of "point-and-shoot" cameras, and Ricoh has agreed to pay those royalties.

The parties agree that a DSLR camera body sold without one or more lenses is not a "self-contained device" and does not fall under the PLA. The parties also agree that a DSLR lens sold without a DSLR camera body is not a "self-contained device" and does not fall under the PLA. The only issue that is in dispute is whether each Pentax DSLR camera body that is sold in the same package as one or more lenses is a "self-contained device" and therefore covered by the PLA. That is the issue that you must determine based on the evidence that you have heard during this trial.

In deciding whether a device is "self-contained," you are to apply the ordinary meaning of that term to which the parties have agreed, which is a device that is "complete in itself" or "complete, or having all that is needed, in itself."
